INDEX OF FUNGI

Since 1940 the *Index of Fungi* has listed, with full bibliographic citations, the names of all new genera, species, infraspecific taxa, new combinations and new names of fungi. Lichens have been included since 1971 and all names at and below the rank of family for all groups have been included since 1987. The names are arranged alphabetically under genera and a host index and epithet index is provided for each part. Two parts appear each year and cumulative indexes are prepared for each volume covering ten years.

The Editors will be grateful for reprints of any papers containing new fungus and lichen names, and for notification of any omissions or corrections.

Subscription 1996: \$110.00 Americas (post free)
